## Education

### ● Software Development

Codespace Academy

2023

Rustenburg Kanana 0393

### ● Matric

Matsukubyane Secondary School

2016-2020

Rustenburg Kanana 0300

## Soft Skills

Creativity

Communication

Teamwork

Adaptability

Critical thinking

PowerPoint

I am enthusiastic about embarking on a career as a software developer. Throughout my academic journey, I have acquired a solid grasp of programming languages, algorithms, and software development principles, and I am eager to apply this knowledge to real-world projects.

During my studies, I had the opportunity to work on several software development projects, both independently and as part of a collaborative team. These experiences have allowed me to develop problem-solving skills, attention to detail, and a passion for writing clean and efficient code.

I take pride in my ability to turn concepts into functional software solutions that align with user needs.

## Experience

### ● Student Software Developer

CodeSpace

Jan 2023 - Present

- Worked on a team project that involved developing a fully functional web application from concept to deployment, applying agile development methodologies.
- Conducted code reviews, provided feedback to peers, and learned best practices for code quality and collaboration.
- Completed individual coding challenges and assignments that improved problem-solving skills and deepened technical knowledge.

## Technical Skills

Javascript

Nodejs

MongoDB

HTML/CSS

ReactJs

Github
